PROJECTS

WATERMARK APP

github.com/Fenryq/Watermark-app

Watermark app - application allows adding a selected watermark to each .png or .jpg file, which can also be in either of these two formats. The program adds the chosen watermark to the files. It handles an unlimited number of images at once and places the watermark at the selected positions: top left corner, top right corner, center, bottom left corner, bottom right corner. The program adjusts the size of the watermark to the chosen dimensions: 50x50, 100x100, 150x150.

PORTFOLIO FLASK WEBSITE

<https://github.com/Fenryq/Portfolio-website>

Portfolio website - this is a web application written in Python, based on the Flask framework. The project's frontend is built on Bootstrap. The application is connected to a database using SQLAlchemy. Within this database, there are descriptions and IDs of other portfolio projects available on the site.

TIC TAC TOE

github.com/Fenryq/Tic-tac-toe

Tic-tac-toe is a game created in Python, based on the tkinter library. The game is two-player, with 9 fields available. Each player has their own symbol (circle or cross), and the player who occupies 3 positions in a single line first wins. After completing a game, the program allows for a rematch without restarting the program.

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
